DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Homa on 5/19/2008.

The application has been amended as follows:

Claim 1 has been amended to recite: "A method for forming a multicellular ceramic article, the method comprising:

- a. forming a mixture of components comprising inorganic ceramic powder materials, a binder, an aqueous solvent for the binder, and an oil-based component having a flash point;

- b. mixing and plasticizing the components to form a plasticized mixture;

- c. shaping the plasticized mixture into a green honeycomb article;

- d. drying the green honeycomb article;

- e. removing at least 70% of the oil-based component from the green honeycomb article by flowing a heated gas longitudinally through the green honeycomb article, wherein the heated gas is flowed at a rate of 0.2 to 8 standard cubic feet per minute (scfm) per 90 cubic inches of the green honeycomb article; and,

f. firing the green honeycomb article having a portion of the oil-based component removed to form the multicellular ceramic article.”.

Claim 5 has been amended to recite: "The method of claim 1 wherein the heated gas is flowed at a rate of 4 to 8 scfm per 90 cubic inches of the green honeycomb article”.

Claim 13 has been canceled.

Claim 14 has been amended to recite: “The method of claim 1 wherein at least 85% of the oil-based component is removed.”.

Claim 37 has been amended to recite: "A method for forming a multicellular ceramic article, the method comprising:

forming a mixture of components comprising inorganic ceramic powder materials, a binder, an aqueous solvent for the binder, and an oil-based component having a flash point;

mixing and plasticizing the components to form a plasticized mixture;
shaping the plasticized mixture into a green honeycomb article comprising longitudinal cells; then

positioning the green honeycomb article on a support device such that the longitudinal cells are arranged vertically; then

removing at least 70% of the oil-based component from the green honeycomb article by forcing a heated gas vertically through the longitudinal cells of the green honeycomb article, wherein the heated gas is flowed at a rate of 0.2 to 8 standard cubic feet per minute (scfm) per 90 cubic inches of the green honeycomb article; then

firing the green honeycomb article into the multicellular ceramic article.”

The following is an examiner’s statement of reasons for allowance: The Applicant Remarks filed on 5/6/2008 and the amended claims now have the feature of “removing at least 70% of the oil-based component from the green honeycomb article by flowing a heated gas longitudinally through the green honeycomb article, wherein the heated gas is flowed at a rate of 0.2 to 8 standard cubic feet per minute (scfm) per 90 cubic inches of the green honeycomb article” distinguishes the present invention from the cited prior arts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHU H. NGUYEN whose telephone number is (571)272-5931. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Phillip Tucker can be reached on 571-272-1095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
